Preschool at the Scarbrough Center

The Scarbrough Center offers a quality preschool program that will lay the foundation for knowledge, social skills and confidence, to have success in Kindergarten and throughout their school years.

- The Preschool teachers are Early Childhood Professionals with degrees in Early Childhood or a related field. They have many years of experience.
- We use a High/Scope Curriculum which is designed for the interests, needs and abilities of each child in the classroom.
- When starting, we offer a parent visit to set up goals for your child. And then have conferences in the fall & spring to go through those goals. At conferences you are also given a portfolio of your child's work and a developmental report.
- We use our Certified Nature Explore Classroom daily where children are discovering and learning in our natural environment.
- The Preschool children eat Family Style Meals and brush their teeth each day.
- We have exciting family events and field trips throughout the year.
- We follow accreditation guidelines from the National Association for the Education of Young Children.
